***Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to an enclosure for a media library with an interlock ,  
classified in class 414, subclass 274.
- II. Claims 18-21, drawn to a method of providing a safety procedure to an  
enclosed area, classified in class 414, subclass 808.

Inventions I and II differ in that invention I deals with the structure of an interlock system for a media library and invention II deals with a control sequence that is not associated with any particular structure. As no structure is given for claims 18-21 a separate search is necessary therefore the restriction is proper.

***Election of Species***

If applicant elects invention I an election of species will also be required in response to this office action. The claims corresponding to invention I (1-17) deal with three species of a safety system. The drawings do not show all of the claimed subject matter in claims 1-17 therefore the election will be made based upon the three broad general concepts of invention I and not particular drawings as is usually the case.

Species I: slowing the speed of the pickers.

Species II: a safety zone defined with loss of electrical power.

Species III a safety zone defined by physical barriers.

Applicant is to choose a species and declare which claims read upon that species and provide drawing showing all claimed features. There do not appear to be any claims generic to the 3 species identified.

***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features pertaining to the elected species must be shown. For example if species III is chosen the location of the physical barriers must be shown as well as a detail drawing of the operational part of the physical barriers. No new matter should be entered.

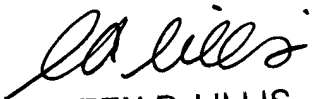

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
